with  
sample

Bring  
patient  
back for  
redraw

Receive  
lab  
results

Contact  
parents

Follow up  
visit for  
elevated  
results

DAY 1

DAY 2-4

DAY 7-9

DAY 11-14

RESULTS IN MINUTES, NOT DAYS.

## How can LeadCare II help your practice?

Testing at the point of care enables you to detect harmful blood lead levels and take swift action in just one visit. In addition, LeadCare II offers important benefits to your practice.

### Improve patient satisfaction

- Parents and patients prefer a fingerstick over venipuncture
- Parents appreciate immediate results
- Parents prefer one visit over multiple trips to office or lab

### Improve efficiency

- Ensure the test is done: no child is “lost to follow-up”
- No laboratory send-outs required
- No follow-up calls to laboratories for results
- No redraws for sample problems

### Improve economics

- Reclaim revenue stream from hospital/reference laboratories and put it back into your practice
- Receive reimbursement for testing with CPT code 83655
- Eliminate costs associated with repeat visits

## LeadCare II can add value to many types of practices. Are any of the following true of yours?

- Do your patients live in neighborhoods with homes built before 1978?
- Do you have more than five well child visits for 1 and 2 year olds each week?
- Do you see Medicaid patients?
- Do you send out at least five lead tests per week?
- Do you test for hemoglobin/anemia at the point of care?
- Is your practice CLIA-waived (or higher)?

**If you answered “yes” to just ONE of the above questions, then LeadCare II could be a valuable tool for your practice.**

**To learn how easily LeadCare II can fit into your workflow or to request a product demonstration, call 800-305-0197 or visit [LeadCare2.com](http://LeadCare2.com).**

**One in four U.S. children lives in housing old enough for lead paint to be a concern!**
