✔ Suitable for

- Roadside
- Random workplace drug testing
- Pre-employment screening

✔ Benefits

• Ultra-fast testing:

With a fastest sample collection time of only 10 seconds and negative results may be observed in less than one minute, the SalivaTracer is designed to provide the user with an ultra-fast drug testing experience.

• Non-invasive sampling:

The SalivaTracer requires only a small amount of oral fluid, eliminating the discomfort and embarrassment associated with urine or traditional saliva drug tests.

• Easy to collect and handle:

The user-friendly design of the SalivaTracer makes the collection of oral fluid quicker, easier and more comfortable.

• Exceptional accuracy and reliability:

The SalivaTracer is highly effective in detecting parent THC and other common drugs from recent drug use and provides reliable and accurate results.
