

WELLlife™

510(k) Cleared / CLIA Waived Respiratory Virus Tests

Our suite of virus tests allows you to rapidly identify and differentiate between the most common respiratory infections using a simple nasal swab test.

COVID-19 / Flu A&B Test Product Features (For Professional and OTC use)

- Detects newer variants including COVID-19 Omicron and Flu Subclade K.
- A single nasal swab provides accurate results in 10 minutes, enabling rapid decisions and helping limit virus transmission.
- 510(k) cleared for confidence in performance and accuracy, suitable for both home and professional testing environments.
- Available in pre-loaded retail holders with multiple test packs, designed for efficient storage and countertop display in retail and pharmacy settings.
- Designed for safe storage at 36°F to 86°F (2°C to 30°C).

Influenza A&B Test Product Features (For Professional and OTC use)

- Differentiates between Influenza A and B, as well as the new Subclade K variant, helping users stay informed as virus strains evolve.
- A simple single nasal swab delivers accurate results in just 10 minutes, supporting quick decisions and helping reduce virus spread.
- 510(k) cleared for confidence in performance and accuracy, suitable for use in both home and professional testing environments.
- Available in pre-loaded retail holder configurations containing multiple test packs, designed for efficient storage and countertop display in retail and pharmacy settings.
- Designed for safe storage at 36°F to 86°F (2°C to 30°C).

COVID-19 Antigen Test Product Features (For Professional and OTC use)

- Detects multiple COVID-19 variants, including Omicron, helping users stay informed as virus strains evolve.
- One simple nasal swab yields accurate results within 10 minutes, facilitating prompt decision-making and assisting in reducing virus spread.
- 510(k) clearance assures performance and accuracy and supports use in home and professional testing environments.
- Offered in pre-loaded retail holder configurations containing multiple test packs, optimized for efficient storage and countertop display in retail and pharmacy settings.
- Designed for safe storage at 36°F to 86°F (2°C to 30°C).
