- Quick
- Accurate
- Convenient
- Low Cost Consumables

Analyzer ships with carrying case, manual, (4) batteries, (1) optical verifier and (1) year warranty. Test strips, capillaries and controls sold separately.

OVERVIEW

The CLIAwaived, Inc Hemoglobin (Hb) Testing System is for the quantitative determination of hemoglobin in non-anticoagulated capillary whole blood or anticoagulated venous whole blood in EDTA (K2, K3, Na2) or sodium heparin. The testing system is designed for point-of-care use in primary care settings. Estimation of hematocrit is only for hemoglobin values from 12.3 to 17.5 g/dL (123 to 175 g/L).

The CLIAwaived, Inc Hemoglobin (Hb) Control Solution is intended to validate hemoglobin testing using the CLIAwaived, Inc Hemoglobin (Hb) Testing System. The CLIAwaived, Inc Hemoglobin (Hb) Testing System is for professional in vitro diagnostic use only.

This device has not been evaluated for pediatric subjects.
