New Product Configurations

60M2C — ECONOMY KIT
- 60-120 applications per kit*
- (24) 2mm and (36) 5mm applicators
- Up to three-year shelf-life
- Ideal for small and large lesions

36F1C — 5MM VALUE KIT
- 36-72 applications per kit*
- (12) 2mm and (24) 5mm applicators
- Up to three-year shelf-life
- Ideal for treatment of smaller lesions

36M1C — VALUE KIT
- 36-72 applications per kit*
- (12) 2mm and (24) 5mm applicators
- Up to three-year shelf-life
- Ideal for small and large lesions

40T1C — 2MM VALUE KIT
- 40-80 applications per kit*
- (40) 2mm applicators
- Up to three-year shelf-life
- Ideal for treatment of smaller lesions

*See Directions for Use for more information

Histofreezer is an excellent solution for removing children’s warts. The treatment is short and painless. I also like the fact that Histofreezer doesn’t contain CFC.”

John Niziol, MD
Pediatrician, Wayne, NJ
Histofreezer is an ultra-portable, patient friendly and easy-to-use cryosurgical system with proven efficacy and safety.¹

**Histofreezer**

- Clinically proven, safe and easy-to-use¹ ³
- Results are comparable to Liquid Nitrogen²
- Histofreezer is patient friendly with a low risk of pain and scarring³
- Application takes 40 seconds or less³
- Does not require a Freeze-Thaw-Freeze procedure³
- Does not require the use of messy and leaky cones, unlike other cryosurgical products³
- Requires no bulky equipment or initial capital investment, unlike Liquid Nitrogen
- Histofreezer is CFC-Free and ozone-friendly³
- Economically priced and reimbursable⁴ ⁵
- NO HAZMAT FEE + All Inclusive Kits = Greater ROI

**Efficacy**

- The efficacy of Histofreezer has been proven through clinical studies and clinical use spanning over 19 years² ⁶-⁹
- Easier, faster and less invasive than cutting or burning

“Histofreezer is a revolutionary product. It’s easy to use, it works, and my patients really love it.”

Edwin S. Hart III, DPM
Podiatrist, Bethlehem, PA

**Indications and Treatment Times**

- **Molluscum Contagiosum** 20 seconds
- **Seborrheic Keratosis** 40 seconds
- **Verruca Plana (Flat Warts)** 20 seconds
- **Verruca Planaris (Plantar Warts)** 40 seconds
- **Verruca Vulgaris (Common Warts)** 40 seconds

**Comparison of Treatment Methods**

Histofreezer vs. Liquid Nitrogen²

A clinical study comparing Histofreezer with Liquid Nitrogen demonstrated comparable results for the treatment of warts and benign lesions.² In addition, Histofreezer offers portability and ease-of-use in a disposable format and no tank refills or dedicated treatment rooms are needed.

**Histofreezer vs. Other Portable Cryosurgical Products**

Compared to other products, Histofreezer can be less expensive per treatment visit; it does not require a Freeze-Thaw-Freeze procedure or messy and leaky cones, and it is also ozone-friendly.³

**Histofreezer vs. Acids (TCA) or Other Topicals**

Acids and topicals can be painful, offer lower resolution rates and may require self-treatment by patients, therefore causing a loss of revenue for the practice.³
